IVAN ABDURRAFIE

Backend Developer
Jakarta, Indonesia | 085155265210 | iabdurrafie.work@gmail.com | linkedin.com/in/ivan-abdurrafie

PROFESSIONAL SUMMARY

Backend Developer with 3+ years of experience building high-concurrency, enterprise-scale systems. Specialized in microservices architecture and CQRS patterns using C# and .NET Core within large corporate environments. Actively expanding into Golang to build faster, more efficient backend services for high-traffic applications. Proven ability to thrive in agile teams, proactively solve complex integration challenges, and keep systems reliable while reducing technical debt. Highly proactive, adaptive, and ready to learn while contributing to impactful digital solutions.

SKILLS

Languages: C#, Golang, SQL
Frameworks: .NET Core, Entity Framework, RESTful APIs
Architecture: Microservices, CQRS Pattern, Distributed Systems, Relational Database Design
Practices: Agile Development, API Integration, Unit Testing, Integration Testing, Rapid Prototyping
Soft Skills: Cross-functional collaboration, proactive problem-solving, adaptability, continuous learning

PROFESSIONAL EXPERIENCE

United Tractors (Astra Group) | Jakarta, Indonesia
Backend Developer | December 2022 - Present

- Built and maintained backend microservices using C# and .NET Core for enterprise applications handling thousands of daily internal operations.
- Implemented CQRS patterns to separate read and write operations, which improved database query response times by approximately 40%.
- Collaborated with cross-functional teams in an agile environment to integrate RESTful APIs and manage data flows across multiple internal platforms.
- Developed comprehensive unit and integration tests that reduced recurring production issues by around 20%.
- Proactively identified performance bottlenecks and refactored legacy code, keeping technical debt manageable and improving system maintainability.

Perum Jasa Tirta I | Malang, Indonesia
Web Developer Intern | November 2021 - May 2022

- Contributed to development and maintenance of internal web applications, focusing on backend logic and database optimization.
- Collaborated with senior developers to optimize application performance, improving data retrieval times by about 15%.

TECHNICAL PROJECTS

Fitness AI Integration Service | Golang, REST APIs, LLM

- Architected a backend service in Golang to orchestrate data between the Strava API, LLM endpoints, and Telegram, processing coaching insights 3x faster than manual methods.
- Leveraged Go's concurrency features to efficiently handle multiple asynchronous API calls, demonstrating practical application of scalable backend design.

EDUCATION

Politeknik Negeri Malang | Malang, Indonesia
Diploma 4 (D4), Informatics Engineering | Graduated 2022
GPA: 3.73 / 4.00
